

Playing music in your slideshow 2003

Note: If using a downloaded music file, you **MUST** save the file to the same folder as your PowerPoint slideshow

Open your PowerPoint slideshow.

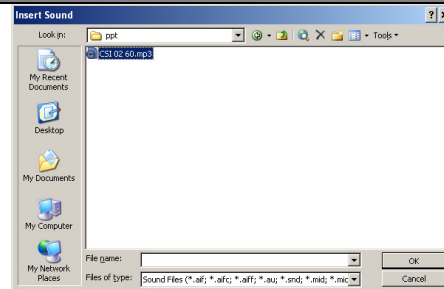

Click **Insert**
Click **Movies and Sounds**
Click **Sound from File**

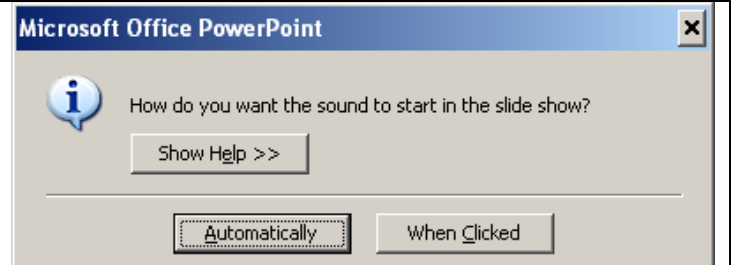

Locate your sound file (it **MUST** be in the same folder as your slideshow).

Click **OK**.

Decide how you want the music to start – automatically or when clicked.

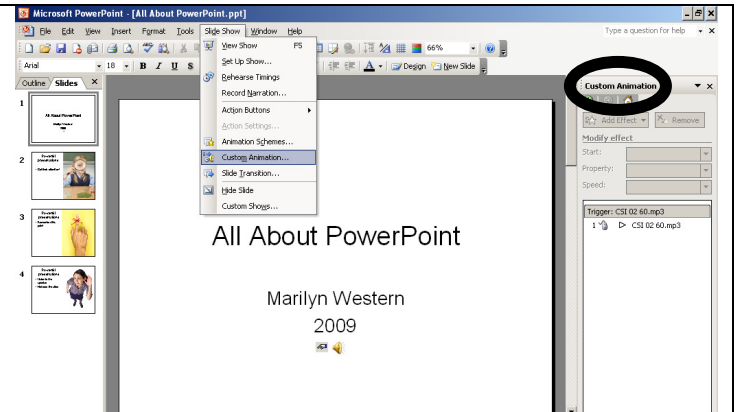

The icon represents your music. You can move it to a corner to make it less intrusive.

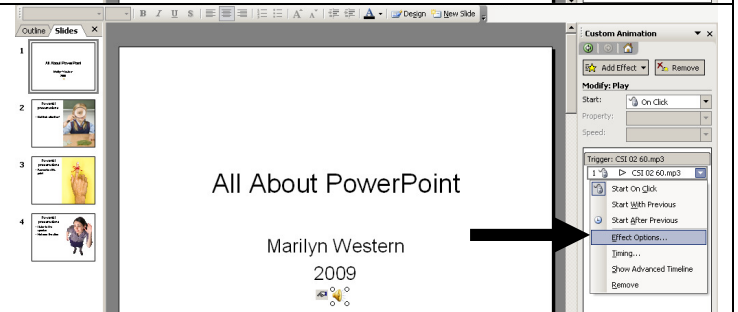

Click on **Slide Show**
Click on **Custom Animation**

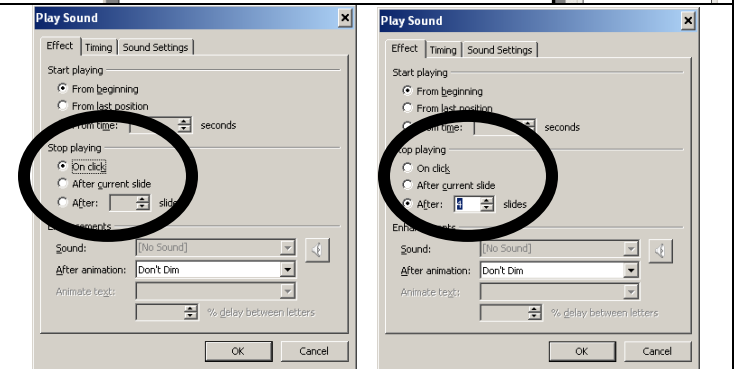

Custom Animation will appear in the right side **Task Pane**.

Your music should appear in the Task Pane.
Click on the **drop arrow** for a new menu.
Click on **Effect Options**.

On the **Effect** tab
Under **Stop playing**
Click on **After**
Change the number to however many slides you want the music to play.
Click **OK**.

Save.
Play your slideshow!
